BSN Medical was created by a fusion of Beiersdorf Medical and Smith & Nephew products. The name stands for brands with a long history that you are familiar with and have come to trust. BSN Medical combines the experience, consistent quality, dependable service and innovative strength born of two global players with long traditions in the worldwide healthcare market.

- BSN Medical is a leading manufacturer in three business units – Orthopaedics, Compression Therapy (JOBST) and Wound Care.
- BSN Medical has a workforce of over 3,000 employees worldwide and offices in over 33 countries.
- BSN Medical applies more casts, splints and bandages than any other company in the world.

**Tensoplast®** Elastic Adhesive Bandage

Porous elastic adhesive bandage made from a high-quality extensible cloth, providing firm controlled compression and strong support. The strong adhesive keeps the bandage firmly adhered even throughout lengthy treatment. The yellow central line on the product permits accurate overlap during application.

### Features and Benefits
- Porous for less maceration
- Firm reliable adhesive
- Fluffy edges for comfort
- Central yellow line for accurate overlap

### Indications
- To retain bandage in irregular areas
- Firm support for injured joints
- To control effusion and swelling
- To approximate wound edges and prevent dehiscence
- Support bandage for sprains and strains

---

**Tensosport® Bleached Elastic Adhesive Bandage**

**Tensoplast®** Elastic Adhesive Tape

Porous elastic adhesive bandage made from a high-quality extensible cloth, providing firm controlled compression and strong support. The strong adhesive keeps the bandage firmly adhered even throughout lengthy treatment.

### Features and Benefits
- For secure fixation or taping with maximum conformability and comfort
- Sprains & strains requiring supportive treatment
- Retention of wound dressings over irregular areas
- Support bandaging of thumb and finger injuries

### Indications
- To retain bandage in irregular areas
- Firm support for injured joints
- To control effusion and swelling
- To approximate wound edges and prevent dehiscence
- Support bandage for sprains and strains

Adhesive Bandages and Tapes

**Tensoplast® Athletic Elastic Adhesive Tape**

Tensoplast® is an elastic adhesive tape which is suitable for medium support or compression. Superior stretch and regain provides firm, controlled compression and support. The porous adhesive helps prevent skin maceration. Fluffy non-fray edges prevents the bandage from rucking or marking.

**Features and Benefits**

- High adhesive properties
- Provides strong compression and long term support
- Water repellent
- Air permeable
- Thinner substrate

**Indications**

- Limitation of movement (sprains & strains)
- Correction of false position & posture

**Lightplast® Pro Elastic Adhesive Tape**

Lightplast® Pro is a hand tearable, elastic adhesive tape, suitable for light support or compression. The unique fabric backing helps to conform to body movement. Ideal for all-purpose taping.

**Features and Benefits**

- Hand-tearable
- Excellent adhesion
- Air permeable
- Light and close fit

**Indications**

- Treatment of sprains & strains
- Prophylactic use against sport injuries

Co-Plus® Elastic Cohesive Bandage

Flexible elastic cohesive bandage made of high strength nylon fibres and elastic yarns, coated with a latex compound, which gives superior cohesive properties. Co-Plus® provides non-slip light support and compression, while its construction is tighter than the latex-free version but still allows the skin to breathe.

Co-Plus® LF Latex-Free Elastic Cohesive Bandage

Co-Plus® LF is a latex-free, cohesive bandage suitable for light support or compression. Co-Plus® LF is flexible, lightweight and hand-tearable. Because of its unique construction, Co-Plus® LF adheres to itself and not to skin, aiding in patient comfort. No clips or fasteners required. Available in assorted colors and sizes.
Strappal® Superior Zinc Oxide Strapping Tape

Constructed from viscose fabric combined with a hypoallergenic zinc oxide adhesive, Strappal® is a high quality strapping tape offering extra strong support and efficient stabilization of joint structures.

<table>
<thead>
<tr>

</tbody>
</table>

**Features and Benefits**
- Hand tearable
- Rigid backing material
- Serrated edges
- Latex Free

**Indications**
- Rigid support for joints or “strapping”
- Limitation of movement
- Fixation of tubes, catheters and wound dressings

Leuko® Sportstape Premium Rigid Strapping Tape

Leuko® Sportstape Premium is a high strength rigid tape with a strong zinc oxide adhesive making it ideal for preventing joint movement and also for the "Low-Dye" Taping Technique.

<table>
<thead>
<tr>
<th>LEUKO® SPORTSTAPE PREMIUM - RIGID STRAPPING TAPE</th>

**Features and Benefits**
- Strong rigid support
- Non-stretch backing material

**Indications**
- Prevention of excessive joint movement
- Low-Dye taping technique
- Toe taping
Leukotape® P is a high strength, rigid strapping tape, with a strong, zinc oxide adhesive. It is porous and hand-tearable, yet offers extra strong support for sprains and strains. Ideal for patellofemoral taping.

<table>
<thead>

- High strength adhesive

**Indications**
- Sprains and strains
- Ideal for patellofemoral taping
- Posture correction
Cover-Roll® stretch Non-Woven Adhesive Bandage

Cover-Roll® stretch is a wide-area fixation dressing, widely used in place of surgical tapes to secure and retain primary dressings on surgical or wound sites as well as a skin protection underneath Leukotape P for physiotherapy techniques. This latex-free bandage provides light compression without causing constriction for joints and highly contoured parts of the body. Convenient and easily cut to size, eliminating unnecessary waste.

### Features and Benefits
- Soft, stretchable non-woven polyester adapts well to the body
- Provides light compression without causing constriction
- Polyacrylate adhesive holds dressing safely, even in the presence of moisture
- Easily cut to eliminate waste
- Latex Free

Leukotape® K Elastic Adhesive Tape for Pain Relief

Leukotape K is an elastic adhesive tape with a paper release layer. Made of 97% cotton and 3% Spandex, this tape is intended to help in soothing the sensation of pain and stimulating mechanoreceptors in the skin, increasing neuro-proprioceptive activity. It can also be used for encouraging lymph drainage.

### Features and Benefits
- Breathable fabric due to wave patterned adhesive
- Durable
- Water repellent
- Low profile
- Cost effective (several applications per roll)
- Latex Free

### Indications
- Soothing sensation of pain
- Stimulating mechanoreceptors in the skin
- Encouraging proprioception & electromyographic activity
- Encouraging lymph drainage
- Posture correction
Elastogrip® Tubular Compression Bandage

Elastogrip® is a polyester and spandex tubular elastic compression bandage which provides consistent and even compression that requires no taping.

- Compression treatment of varicose veins and ulcers
- Treatment of sprains and strains
- Assisting in rehabilitation following orthopaedic treatment
- Excellent as a dressing over paste bandages
Use an innovative approach to treat your patients with LEUKOTAPE® K

Elastic Adhesive Tape

Pain Relief Technique by Improving

• Sensory Function
• Muscle Function
• Lymphatic Function
• Joint Function
Small Tape with Large Effect

**Leukotape® K**, used with the Neuro-Proprioceptive Taping Technique, is a flexible tape which is applied directly on the skin in the affected area.

You can feel it work after a few minutes, as the pain decreases.

Skin activated to Reduce Pain

The Neuro-Proprioceptive Taping gives the patient double-action pain relief.

Firstly, pain is registered in the body by neuro-receptors. Neuro-Proprioceptive Taping Technique interrupts the pain signal to the brain. The pain disappears and/or diminishes.

The second is to improve the blood circulation in the affected area by the wave pattern of adhesive. The tape lifts the skin, decongests the lymphatic fluid and blood and so the healing process is accelerated.

What can Neuro-Proprioceptive Taping do for your patients?

Many painful conditions can be treated successfully with NPT, depending on the technical applications such as Inhibition, Facilitation, Support and Correction:

- Epicondylitis
- Patellofemoral Syndrom
- Shin Splint
- Achilles Tendinitis
- Plantar Fasciitis
- Lymphoedema and more

We can show you How!

BSN medical offers Neuro-Proprioceptive Introduction Training in Canada to you. These seminars are aimed at Physicians, Physiotherapists, Athletic Trainers, Massage Therapists and Medical Care Givers.

*We look forward to seeing you!*
